

Our Daily Red

**USDA
ORGANIC**

WHAT MAKES OUR WINES SO PURE?

In the beginning, there was wine. It was pure and natural. These days? Not so much. Most wines add preservatives, called sulfites. Not us. We make Our Daily Wines without adding preservatives, so you can enjoy wine the way it was meant to be: pure and delicious.

NO DETECTABLE SULFITES

By definition, no sulfites can be added to certified organic wines, even though organically grown grapes have naturally occurring elemental sulfur. Our Daily Wines are among the few wines that contain no detectable sulfites. How do we accomplish this? Zero sulfites are added before or after fermentation. The natural antioxidants in the wine, tannins, and color molecules act to scavenge oxygen. During fermentation, any elemental sulphur that may be naturally present in the grapes is converted to a gaseous form, and is blown off during the remaining fermentation process.

USDA ORGANIC

Organic simply means that there are no pesticides, fungicides, synthetic fertilizers or chemicals allowed on the vines or in the soil. Our Daily Wines are Organic Certified (since 1989!), which requires certification of both the vineyards and the winemaking facility.

GLUTEN FREE

Our wines do not contain proteins that occur naturally in wheat, rye, barley and other types of hybrids of these grains.

VEGAN

Our wines do not contain any animal-derived ingredients or dairy products.

TASTING NOTES

Lighter-style and fruit forward with a hint of violets on the nose and loaded with black fruit on the palate.

FOOD PAIRING

Veggie pizza, creamy cauliflower mash, turkey burgers

VARIETALS

Syrah, Cabernet Sauvignon, Ruby Cabernet, Carignan

VINEYARDS California

VINTAGE 2018
