HARVEST NOTES

2020 had a warm, dry winter. Rain and cold weather did not hit until the end of March but was enough to give the vines enough access to moisture for an early spring start to the growing season. Summer saw beautiful cool mornings and very warm days. It looked as though the harvest would start early and progress quickly, but the August wildfires caused major disruptions to the vintage as a whole. The Cabernet Sauvignon harvest was smaller than usual. We were able to be selective in the fruit we used so that we didn't see much smoke impact.

SOURCING NOTES

Fruit used in this beautiful wine is from primarily low elevation sites in the southern part of the Napa Valley.
