

# PERIPHERY

## *Pinot Noir*

### MONTEREY COUNTY

Periphery showcases the complexities of wine growing seasons. California vines can withstand rugged temperatures from cool morning fog to warm afternoon sun. The vines are pushed to their limit, developing ripe aromatics throughout the season, creating the fullest expression of each wine in the glass.

#### ABOUT MONTEREY COUNTY:

Covering a large area, the Monterey AVA is diverse in both climatic make-up and the types of grapes grown. Framed by the Gabilan and Santa Lucia ranges, the weather patterns warm as you move down the valley: the southern end of the Monterey AVA basks in the sun with daytime temperatures approaching 100 degrees at times, while still being mildly tempered by the afternoon breezes from the Pacific Ocean.

#### TASTING NOTES:

Deep garnet in color. Fresh cherry aromas on the nose along with crushed raspberry jam and rose petal notes. Light oak treatment brings a hint of cedar with warm baking spice. Fruit driven and silky soft on the palate with blackberry candy and some earthiness on top of the bright red fruits.

#### SUGGESTED FOOD PAIRINGS:

Roast turkey with cranberry sauce or wild mushroom risotto.

ABV: 13.4 %
